Getting What You Want By Knowing Who You Are: Self-Confidence vs. Self-Awareness

As women, we often don't realize our uniqueness, which can diminish self-confidence. We think too much about what we are lacking rather than determining and using our talents. This presentation will explore the tools to identify our talents, outline the ways in which to build confidence through awareness and elevate us to more powerful communication which eases the processes of negotiation and delegation, both vitally important to success.

Fireside Chat - Leading an Inclusive Organization: Identifying and Addressing Unconscious Bias

This interactive session will look at the U.S. business community's focus over the last year on diversity, inclusion and racial equality, following the deaths by police of Breonna Taylor, George Floyd and others, and the nationwide protests that resulted. Karen and Whytni will discuss the role large and small businesses owned and run by women can play in this national movement. How do women leaders identify unconscious bias, support employees of color, ensure opportunities for advancement, set goals for improvement, and evaluate organizational efforts? How do we have open, honest conversations about these uncomfortable topics, and what can we all do to be allies in this important work?

Build a Brand of Conviction and Make a Living Doing What You Value

In an age where consumers have lost trust, it's no longer good enough to tell stories through campaigns. Brands of conviction are designing strategies around an issue rather than a product. For a brand to be meaningful, it must build a deeper, more valuable social connection by setting the agenda, taking a stand, and mostly being trusted. In this dynamic talk, we'll cover how certain brands are making cultural purpose the heart of what they do and who they are, not just a sidebar. We'll touch upon how you can create and construct a brand of conviction that champions an issue close to your heart and appeal to people's emotions – and to what the brand represents.
