

The Arlington Chamber of Commerce supports HB 2204 and the establishment of the G3 program. Advancing workforce development policy initiatives will position Virginia as a global leader in workforce readiness, and so we support a forward-looking approach where innovation and creativity foster better outcomes that benefit our community. The Chamber supports funding for career and technical education opportunities at all educational levels and for all stages of life. The G3 program is an important tool for helping Virginians pursue an education in the Commonwealth's community college system. We thus ask you to recommend reporting the bill.
